#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

The response filed has been entered and considered.

Claims 1-12 are pending.

An action on the merits follows.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Epling (U.S. Patent Application Publication No. 2005/0091101).

Art Unit: 3625

Referring to claim 1. Epling discloses a method for conducting electronic commerce transactions among participants in an E-marketplace, comprising the steps of:

- Obtaining privacy-use information for each participant (paragraph 27 & figure 1);
- Comparing the privacy use information for each participant to determine matches (figure 2);
- Only allowing transactions to occur between participants who have matching privacy use information (paragraph 11 and figure 3). The examiner notes that Epling discusses stopping any transactions before they occur if the privacy use information does not match.

Referring to claim 2. Epling further discusses a method wherein said obtaining step comprises at least the step of requiring each participant in the E-marketplace to present to the E-marketplace their P3P policy (paragraph 9 & figure 2).

Referring to claim 3. Epling further discloses a method wherein said obtaining step comprises at least the steps of:

- Presenting each participant with questions that elicit their privacy-use information (paragraph 27); and

Art Unit: 3625

- Storing the elicited privacy-use information for use in said comparing step (paragraph 29).

Referring to claim 4. Epling further discloses a method wherein said privacy-use information includes at least one of: use information pertaining to elicited e-mail addresses; use information pertaining to financial; use of personal information; use of business information, and the delivery of advertising to the participant (paragraph 18).

Referring to claims 5-8. Claims 5-8 are rejected under the same rationale as set forth above.

Referring to claims 9-12. Claims 9-12 are rejected under the same rationale as set forth above.

#### ***Response to Arguments***

Applicant's arguments filed December 27, 2005 have been fully considered but they are not persuasive.

Applicant remarks that "Epling is concerned with transforming, i.e. modifying, the privacy-use policies to reach a point of agreement where the consumer and vendor can continue on with the transaction".

The Examiner notes that there is nothing in the claim language which recites that a modification of the privacy-use policies to arrive at a convergence on an agreement is not within the scope of the claims. That is, even if Epling involves a modification of original privacy-use policies the claim language still reads on this scenario inasmuch as the transaction does not occur until there is an agreement, i.e. a matching of privacy-use information.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Willner et al. (US 2003/0023451 A1) discloses a method and apparatus for identifying privacy levels. A determination is made regarding what level of privacy is being applied to an interaction and a notification may be sent to the user to inform the user of such privacy level.

Bohrer et al. (US 2003/0088520 A1) discloses system, method, and business method for enforcing privacy preferences on personal-data exchanges across a network. A release process compares the requester privacy statement to the subject constraints (authorization rules) and releases the private,

subject data release in a response message to the requester only if the subject constraints are satisfied.

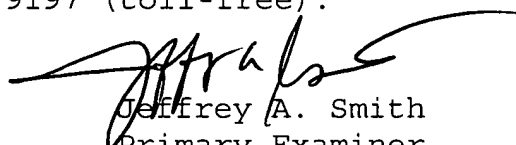

Duri et al. (US 2004/0054918 A1) discloses a secure system and method for enforcement of privacy policy and protection of confidentiality.
